INTRODUCTION

CENTER FOR HEALTH STATISTICS OFFICE OF HEALTH INFORMATION AND RESEARCH

The mission of the **Center for Health Statistics (CHS)** is to facilitate the collection, validation, statistical analysis, and dissemination of health data in support of the mission of the California Department of Health Services (DHS).

CHS is responsible for coordinating and overseeing the collection, management, and dissemination of public health and vital statistics data in conjunction with other State agencies, local government agencies, and other customers. CHS is also responsible for providing technical assistance relating to vital statistics data to users within DHS and external to DHS (local government, academia, researchers, the general public, etc.), actively promoting and disseminating information relevant to the health of the public and aiding decision makers in setting policies, managing problems, and identifying emerging health trends. CHS is composed of the Office of Vital Records, the Office of Health Information and Research, and the Administrative Support Section.

The **Office of Health Information and Research (OHIR)** is responsible for coordinating the development of health information systems and conducting research relating to the health status of California's population. OHIR is composed of the Vital Statistics Section and the Planning and Data Analysis Section.

In conjunction with the Information Technology Services Division (ITSD), OHIR develops and tests user interface applications for accessing information about the Department's databases using the Internet/World Wide Web.

The **Vital Statistics Section (VSS)** is responsible for maintaining, analyzing, distributing, and improving the data contained within California's electronic vital statistics system. VSS maintains electronic Statistical Master Files of live births, deaths, and fetal deaths. VSS processes and fills requests for copies of vital statistics files in mainframe, personal computer, and paper formats; analyzes the data contained in electronic files; and produces annual and ad hoc vital statistics reports for California. VSS provides technical assistance to the Department's programs in using California's vital statistics data and applying appropriate statistical analysis for purposes of program planning and evaluation. VSS posts vital statistics tabulations and reports on the Internet.

The **Planning and Data Analysis Section (PDAS)** is responsible for maintaining, analyzing, and distributing data needed for assessing the health status of Californians. PDAS assembles and analyzes department-wide data relating to the Year 2000 and Year 2010 National Health Promotion and Disease Prevention Objectives and produces related reports. PDAS compiles and analyzes data pertaining to key health status indicators for California's counties and produces related reports. PDAS assists the Department's programs in developing common data sets and standard data definitions, and in sharing and linking health information among their various databases.

The website has the current Vital Statistics publications and reports, as well as the catalog and order forms.

California Department of Health Services, Vital Statistics Query System, Instructions/Guide Home Page:

<http://www.applications.dhs.ca.gov/vsq/default.asp>

The Vital Statistics Query System has been developed to provide an interactive Internet interface to obtain tabular summaries and statistical reports from California's birth and death vital statistics databases. This internet offering has been designed to provide data from Vital Statistics birth and death databases for California and its 58 counties. This system provides the number of events along with the ability to apply population based statistical methods to those events. An event refers to the number of incidences in a specific location (county) for a given year (e.g. 1997) for either births or deaths that has been tailored to the specific criteria selected.

How to Order Certified Birth/Death Certificates:

More than 70 agencies in the United States Federal Government produce statistics of interest to the public. The Federal Interagency Council on Statistical Policy maintains this site to provide easy access to the full range of statistics and information produced by these agencies for public use.

VITAL STATISTICS DATA PRODUCTS

The Vital Statistics Section (VSS) produces vital statistics data in electronic formats. The primary data sources are the birth, death, and fetal death certificates. These California data are made available through an extensive set of files available on CD-ROM or Mainframe. This catalog lists and describes these files in detail. This catalog also includes information on the content of each file, ordering instructions, costs, and other information to aid the user in identifying and acquiring VSS data files.

CD-ROM Data Files

The CD-ROM files contain the raw data in American Standard Code Information Interchange (ASCII) format. These files are not comma-delimited. There is no software included and the files are not executable or searchable as is. The data must be uploaded into a statistical database package (such as SAS or SPSS) to search and/or aggregate the data for use. The files cannot be initially opened in Excel. All necessary file documentation and record layouts are included.

Mainframe Data Files

The mainframe files are available in 9-track or 18-track Extended Binary Coded Decimal Interchange Code (EBCDIC). Tapes are available at 1,600 or 6,250 bytes per inch on 9-track reels, and 38,000 bytes per inch on 18-track cartridges. These files are distributed with standard IBM labels only. The data and record layouts are the same as the CD-ROM Files.

CONFIDENTIALITY

VSS releases data files in a manner that will not compromise the confidentiality of the parents, children, or decedents on the certificates. To accomplish this level of confidentiality, names, certificate numbers, social security numbers, and other personal identifiers are removed from files released to the public.

All data file requestors are required to complete an application to access the California Vital Statistics Files. Requestors are required to sign the following "Vital Statistics Access Agreement" which is on the second page of the application:

"I, the undersigned, agree not to sell or assign the files or the data therein provided under this agreement. I agree that said data will not be reproduced except to the extent necessary to meet the proposed use. I understand that, per Health and Safety Code, Section 102426, the mother's marital status field may only be used for 'demographic and statistical analysis' and will not be made available with personal identifiers. Utilization of data in any way to identify an individual without formal approval of the Committee for the Protection of Human Subjects and the State Registrar is prohibited by law. I understand that the release of confidential data with personal identifiers or the linkage of non-confidential data with other files, so as to identify an individual's confidential data without prior approval, may be punishable by a fine of \$500 or six months in jail (Health and Safety Code, Section 102475)."

"I agree not to release or give public access to names or other personal identifiers from Birth, Death, or Fetal Death Files."

COMMITTEE APPROVALS TO ACCESS PERSONAL IDENTIFIERS

Personal Identifiers are those fields on the data files that could identify an individual, such as names, State File Numbers, and/or Social Security Numbers. These fields are confidential and are only available on specific files. Approvals are required to obtain the confidential files.

In some cases, data users (such as public health officials or researchers) will have a need for Personal Identifiers. In this instance, the user is required to obtain approvals from the Committee for the Protection of Human Subjects (CPHS) and/or the Vital Statistics Advisory Committee (VSAC) prior to obtaining the confidential data. Research protocol must be submitted to the Committees and, once the files are obtained, strict guidelines must be maintained to protect the confidentiality of the data. Data will be released in compliance with the laws that are current at the time of release.

Committee for the Protection of Human Subjects (CPHS)

For more details on obtaining these approvals, please contact Jan Christensen of the Vital Statistics Section or Fred Richards of the Planning and Data Analysis Section.

Source Credits

Any published material derived from our data should acknowledge the Department of Health Services as the source of the data. It should also include a disclaimer that credits the author (recipient of the data) with any analyses, interpretations, and conclusions, and advises that DHS is only the initial data source. Users who wish to publish a technical description of the data should make a reasonable effort to ensure that the description is consistent with that published by DHS.

BIRTH FILES

Compiled from the information reported on live birth certificates, these files contain detailed demographic information related to the child, mother, and father, as well as medical data related to the births.

For a list of the variables included on each birth file, please refer to the **“Table of Birth File Variables”** at the end of this section on Pages 8 and 9.

Birth Statistical Master Files

The Birth Statistical Master Files are the largest and most comprehensive birth data files. These files are available with or without the confidential Personal Identifiers. CPHS and VSAC approvals are required to obtain the confidential birth files with Personal Identifiers. For more information on approvals, please see the section entitled “Committee Approvals to Obtain Personal Identifiers.”

Each year of data is on a separate CD or Mainframe file.

Years Available: 1960 to 2001

Cost:

CD-ROM:

\$200 per year

Mainframe:

\$300 first file \$250 each additional file

Birth Public Use Files

The Birth Public Use Files are sub-sets of the Birth Statistical Master Files. These files are intended to be smaller and easier to use. These files contain only the most commonly requested variables and do not contain any Personal Identifiers. The file structure and the variable coding methodology are designed to facilitate trend analysis and to simplify computer programming.

The CDs are available with the years 1989-1999 on one CD and the most current years are on separate CDs.

The Mainframe tapes are available in two-year files from 1989-90 to 1999-00 and the year 2001 is on a separate file.

Years Available: 1989 to 2001

Cost:

CD-ROM:

2001: \$100

2000: \$100

89-98: \$200

Mainframe:

Each file contains two years of data, the 2001 data is on a separate file.

\$300 first file \$250 each additional file

Birth Cohort Files

The Birth Cohort Files contain data for all live births that occurred in a calendar year, death information for those infants who were born in that year but subsequently died within 12 months of birth, and all fetal deaths that also occurred during that calendar year. This file is especially valuable for studying infant deaths, as well as birth outcomes, because it permits examination of both birth and death information for those infants who died.

These files are available with or without the confidential Personal Identifiers. CPHS and VSAC approvals are required to obtain the confidential birth files with Personal Identifiers. For more information on approvals, please see the section entitled "Committee Approvals to Obtain Personal Identifiers."

Each year of data is on a separate CD or Mainframe file.

Years Available: 1960; 1965 to 1997; 1999

Files are not available for 1961-1964 and 1998.

Cost:

CD-ROM:

\$250 per year

Mainframe:

\$300 first file

\$250 each additional file

For a list of the variables included on each birth file, please refer to the "**Table of Birth File Variables**" on the next two pages.

Please Note: The variables in this table are examples of the variables that can be found on the birth files. Not all variables listed will be on all years of the birth files, particularly older years. If interested in specific variables, please call prior to ordering files.

Table of Birth File Variables

Variables	Birth Statistical Master File	Birth Public Use File	Birth Cohort File
Abnormal Conditions	X		X
Age Of Decedent			X
Age Of Father	X	X	X
Age Of Mother	X	X	X
Amendment Type			X

Place Where Death Occurred			X
Planned Birthplace	X		X
Principal Source Of Payment For Prenatal Care	X	X	X
Race-Ethnicity Of Decedent			X
Race-Ethnicity Of Father	X	X	X
Race-Ethnicity Of Mother	X	X	X
Sex Of Child	X	X	X
State Of Residence Of Mother	X		X
Terminations 20 Weeks Plus	X		X
Terminations Before 20 Weeks	X		X
Total Children Born Alive	X	X	X
Total Children Ever Born	X	X	X
Type Facility Where Decedent Died		X	X
Type Of Birth	X		X
Type Of Certifier Of Birth	X		X
Type Of Certifier Of Death			X
Type Of Event	X		X
Underlying Cause Of Death			X
Year Of Event	X	X	X

* These variables are included only on files with Personal Identifiers. CPHS and VSAC approvals are required to obtain Confidential Birth Files with Personal Identifiers. Please see the section entitled "Committee Approvals to Obtain Personal Identifiers."

** Starting in 1997, some files include real marital status (as compared to the use of an inferred method). Files prior to 1997 and files with personal identifiers include inferred marital status only.

*** Starting in the year 2000, multiple race fields are available on the birth files.

DEATH FILES

(2001 death data due to be released late in 2002.)

Compiled from the information reported on death certificates, these files contain detailed demographic information related to the decedent, as well as medical data related to the death.

The medical data will include the underlying cause of death, which is coded according to the International Classification of Diseases (ICD). Please note that the ICD codes have undergone revisions over time:

7TH Revision prior to 1969	(ICD-7)
8TH Revision 1969-1978	(ICD-8)
9TH Revision 1979-1998	(ICD-9)
10TH Revision 1999 to present	(ICD-10)

For examples of the variables included on each death file, please refer to the **“Table of Death File Variables”** at the end of this section on Pages 13 and 14.

Death Statistical Master Files

The Death Statistical Master Files are the largest and most comprehensive death data files.

These files are available with or without the confidential Personal Identifiers. On the death files, the California Identifiers are Personal Identifiers of those people who died within the State of California regardless of residency. The Out-of-State Identifiers are Personal Identifiers of those California residents who died outside of California.

VSAC approval is required to obtain the confidential death files including the California and/or Out-of-State Personal Identifiers. For more information on approvals, please see the section entitled “Committee Approvals to Obtain Personal Identifiers.”

On CD, the years prior to 1999 are available in decade groupings. The years beginning with 1999 are on separate CDs.

On Mainframe tapes, each year is a separate file.

Years Available: 1970 to 2000

The years 1960-1969 are available in the Merged Death File format only.

Cost:

CD-ROM:

2000:	\$150
1999:	\$150
89-98:	\$300
80-88	\$300
70-79:	\$300

Mainframe:

Each year is a separate file.
\$300 first file \$250 each additional file

Death Public Use Files

The Death Public Use Files are sub-sets of the Death Statistical Master Files. These files are intended to be smaller and easier to use. These files contain the most commonly requested variables and do not contain any Personal Identifiers. The file structure and the variable coding methodology are designed to facilitate trend analysis and to simplify computer programming.

The CDs are available with the years 1989-1998 on one CD and the most current years are on separate CDs.

The Mainframe files are available with 1989-1998 included in one file or individual years may be purchased separately. 1999 and 2000 are available separately only.

Years Available: 1989 to 2000

Cost:

CD-ROM:

2000: \$100

1999: \$100

89-98: \$200

Mainframe:

1989-98 available on one file or separately

1999 and 2000 available separately only

1989-98: \$300 \$100 per individual year

Merged Death Files

The Merged Death Files are sub-sets of the Death Statistical Master Files and contain the most commonly requested variables. These files have a consistent record layout over all the years and are intended to facilitate long-term trend analysis and to simplify computer programming.

These files are available with or without the confidential Personal Identifiers. On the death files, the California Identifiers are Personal Identifiers of those people who died within the State of California regardless of residency. The Out-of-State Identifiers are Personal Identifiers of those California residents who died outside of California.

VSAC approval is required to obtain the confidential death files including the California and/or Out-of-State Personal Identifiers. For more information on approvals, please see the section entitled "Committee Approvals to Obtain Personal Identifiers."

There are five years of death data on a single file for the years prior to 2000. The 2000 file is separate.

Years Available: 1960-64 to 1995-99 and 2000

Cost:

CD-ROM:

\$200 for each 5-year file

\$100 for the 2000 file

Mainframe:

\$300 first file

\$250 each additional file

Multiple Cause of Death Files

These files were created by the National Center for Health Statistics and include underlying, immediate, intermediate and contributing causes of death and demographic data. Each record may include up to 20 causes of death derived from California death certificates. All causes of death are coded according to the International Classification of Diseases. These files do not include Personal Identifiers.

Each year of data is on a separate file.

Years Available: 1970 to 1999

Cost:

CD-ROM:

\$100 per year

Mainframe:

\$200 first file

\$150 each additional file

Fetal Death Statistical Master Files

The Fetal Death Statistical Master Files contain data obtained from fetal death certificates registered in California each year. These files contain detailed information related to the child, mother, and father, as well as medical data related to the fetal death. The medical data includes the underlying cause of the fetal death. The cause of death is coded according to the International Classification of Diseases.

These files are available with or without the confidential Personal Identifiers. CPHS and VSAC approvals are required to obtain the confidential fetal death files with Personal Identifiers. For more information on approvals, please see the section entitled "Committee Approvals to Obtain Personal Identifiers."

Years Available: 1970 to 2001

Cost:

CD-ROM:

2001: \$ 50

2000: \$ 50

1999: \$ 50

89-98: \$200

80-88 \$200

70-79: \$200

Mainframe:

Each year is a separate file.

\$100 first file \$ 50 each additional file

For examples of the variables included on each death file, please refer to the "**Table of Death File Variables**" on the next two pages.

Please Note: The variables in this table are examples of the variables that can be found on the death files. Not all variables will be on all years of the death files, particularly older years. If interested in specific variables, please call prior to ordering files.

* These variables are included only on files that include Personal Identifiers. VSAC approval is required to access Confidential Death Files with Personal Identifiers. CPHS and VSAC approvals are required to access Confidential Fetal Death Files with Personal Identifiers. Please see the section entitled "Committee Approvals To Obtain Personal Identifiers."

** Effective in 1999, causes of death are coded according to the International Classification of Disease-Revision 10 (ICD-10). The ICD Codes have undergone revisions over time. Please see the section under "Death Files" for further information.

*** Starting in the year 2000, multiple race fields are available on the death files.

ORDER FORM TO PURCHASE CALIFORNIA'S STATEWIDE VITAL STATISTICS FILES ON CD-ROM

Additional copies of this order form can be downloaded from the Center for Health Statistics website at:

<http://www.dhs.ca.gov/hisp/chs/OHIR/Publication/publicationindex.htm>

ORDERING INFORMATION

If you are interested in purchasing copies of the Vital Statistics CD-ROM data files, please complete the attached order form. Please read and sign the agreement on the second page. Please enclose your **check or money order** payable to the Department of Health Services.

We cannot accept credit cards or purchase orders.

We can send invoices if needed, but cannot process orders until checks are received.

Please mail the completed order form and check to:

Department of Health Services
Office of Health Information and Research
Vital Statistics Section
Attn: Jan Christensen
MS 5103, Building 174
P.O. Box 997410
Sacramento, CA 95899-7410

Phone #: (916) 552-8095

Fax #: (916) 650-6889

Confidential Files Including Personal Identifiers:

Confidential files including Personal Identifiers are marked with an asterisk (*) on the order form. Personal Identifiers are those fields that could identify an individual, such as names or State File Numbers. These fields are confidential and approvals are required to obtain a file that includes Personal Identifiers. Please obtain approvals from the Committee for the Protection of Human Subjects (CPHS) and the Vital Statistics Advisory Committee (VSAC) prior to ordering the data files.

For more information on obtaining approvals, please see the catalog section entitled "Personal Identifiers" or you can contact Jan Christensen of the Vital Statistics Section or Fred Richards of the Planning and Data Analysis Section.

- **** CPHS and VSAC approvals are required to obtain Birth and Fetal Death Files including Personal Identifiers. Please attach required approval letter or inquire about details prior to ordering these files.
- *** VSAC approval is required to obtain Death Files including Out-of-State and/or California Personal Identifiers. Please attach required approval letter or inquire about details prior to ordering these files.

Proposed Use (Attach additional sheets if necessary)

User's Name(s): Please indicate names of all persons who will have access to requested file(s).

Vital Statistics Access Agreement (Signature Required)

I, the undersigned, agree not to sell or assign the files or the records therein provided under this agreement. I agree that said files will not be reproduced except to the extent necessary to meet the proposed use. I understand that per Health and Safety Code, Sec. 102426, the mother's marital status field may only be used for "demographic and statistical analysis" and will not be made available with personal identifiers. Utilization of vital statistics files in any way to identify an individual without formal approval of CPHS and the State Registrar is strictly prohibited. I understand that the release of confidential data with personal identifiers or the linkage of non-confidential data with other files so as to identify an individual's confidential data without prior approval may be punishable by a fine of \$500 or six months in jail (Health and Safety Code, Sec. 102475).

I agree not to release or give public access to names or other personal identifiers from the California Birth, Death, and/or Fetal Death Files. I further agree to the following for any material derived from these vital statistics files:

1. To acknowledge the California Department of Health Services, Center for Health Statistics as the original source.
2. To include a disclaimer that credits any analyses, interpretations, or conclusions reached to the author and not to the California Department of Health Services, Center for Health Statistics.
3. To assure that technical descriptions of the data are consistent with those provided by the California Department of Health Services, Center for Health Statistics.

ORDER FORM TO PURCHASE CALIFORNIA'S STATEWIDE VITAL STATISTICS FILES ON MAINFRAME TAPE

Additional copies of this order form can be downloaded from the Center for Health Statistics website at:

<http://www.dhs.ca.gov/hisp/chs/OHIR/Publication/publicationindex.htm>

ORDERING INFORMATION

If you are interested in purchasing copies of the Vital Statistics Mainframe data files, please complete the attached order form. Please read and sign the agreement on the second page. Please enclose your **check or money order** payable to the Department of Health Services.

We cannot accept credit cards or purchase orders.

We can send invoices if needed, but cannot process orders until checks are received.

Please mail the completed order form and check to:

Department of Health Services
Office of Health Information and Research
Vital Statistics Section
Attn: Jan Christensen
MS 5103, Building 174
P.O. Box 997410
Sacramento, CA 95899-7410

Phone #: (916) 552-8095

Fax #: (916) 650-6889

Confidential Files Including Personal Identifiers:

Confidential files including Personal Identifiers are marked with an asterisk (*) on the order form. Personal Identifiers are those fields that could identify an individual, such as names or State File Numbers. These fields are confidential and approvals are required to obtain a file that includes Personal Identifiers. Please obtain approvals from the Committee for the Protection of Human Subjects (CPHS) and the Vital Statistics Advisory Committee (VSAC) prior to ordering the data files.

For more information on obtaining approvals, please see the catalog section entitled "Personal Identifiers" or you can contact Jan Christensen of the Vital Statistics Section or Fred Richards of the Planning and Data Analysis Section.

PUBLIC HEALTH RATE PROGRAM (PhRate) DESCRIPTION

This program provides users with a tool for calculating rates and percentages and their standard errors and confidence intervals and to test whether or not the observed differences in these rates or percentages are statistically significant. It also uses regression to determine whether there is a statistically significant trend in a series of rates or percentages.

Users of this program will need to have the raw data necessary (eg. numerators and denominators) for calculating the various rates and percentages. For example, to calculate a crude death rate, the user will need to have the total number of deaths (numerator) and the population-at-risk (denominator). The menu-driven program will prompt you to enter the numerator and denominator for each rate or percentage. The resulting rates or percentages along with their associated standard errors and 95% confidence intervals will be calculated by the program.

This program is not a tutorial on the proper calculation of public health rates nor, more importantly, on their interpretation and use in determining if a health problem exists in a particular community or among a particular subgroup of the population. It is assumed that the user of this program has a basic understanding of the principles of epidemiology and the use of public health statistics. Those without at least an introductory level of knowledge concerning statistics should not be using this program. This program is not a substitute for the thorough in-depth epidemiological and statistical analyses that are required in determining the presence or absence of a potential public health problem.

PUBLICATIONS

Publications may be ordered by using the "Publications Order Form" on page 31 or by checking the desired reports on the complete list of publications found on pages 32 to 42.

Please enclose full payment with your order. We cannot accept credit cards or purchase orders.

MAJOR REPORTS

These major reports are the most recently published of our larger comprehensive reports. A complete list of reports can be found at the end of this section on pages 32 to 42.

Vital Statistics of California, 1999

(April 2002)

#R02-04000 \$20.00

This annual report provides a historical series of vital statistics data prepared from information received on the California birth, death, and fetal death certificates through the 1999 calendar year. This report contains county level data by various age and race/ethnic groups as well as data by gender. This information is used to evaluate health trends, plan health care, and determine health policy. Prior years are also available.

Related Reports

Advance Report: California's Vital Statistics, 2000

(June 2002)

#R02-06000 \$10.00

This report is an advance report produced prior to the larger "Vital Statistics of California" report. The purpose of this report is to provide early access to California's 2000 summary vital statistics data. Data are presented on the number and rate of live births, deaths, fetal deaths, and infant deaths for the state and counties. This report contains statewide and county level data by various age and race/ethnic groups as well as data by gender. Prior years are also available.

California 2000 Vital Statistics Data Summary

(Pending Report Approval)..... FREE

This summary is a double-sided, foldout report of California data. This mini-report contains birth and death data in an easy-to-read, compact format containing both trend and 2000 calendar year data. Data Summaries are also available for data years 1996-1999.

County Health Status Profiles, 2002

(April 2002)

#R02-04000 \$10.00

The “County Health Status Profiles” report is presented each year during California’s Public Health Week. This report contains data related to a set of key health status indicators recommended by the United States Public Health Service for monitoring state and local progress toward achieving some of the goals set forth in “Healthy People, 2010”. These health status indicators are related to mortality, morbidity, natality, and poverty. For each indicator, the counties presented in Profiles are ranked according to their respective rate from best to worst and from worst to best, depending on the type of indicator. California’s rate and the year 2010 national health objective for each indicator are also included for comparative purposes. Prior years of this report are also available.

Health Data Summaries for California Counties, 2000

(October 2000)

#R01-10000 \$20.00

This biennial report contains 180 health and sociodemographic indicators for each of California’s 58 counties. These indicators describe the county’s population, socioeconomic status, health status, health services utilization, service costs, and availability of health resources. This report contains county level data by various age and race/ethnic groups as well as data by gender. Prior years are also available.

Healthy California 2000 Midcourse Review: California’s Experience in Achieving the National Health Promotion and Disease Prevention Objectives

(February 1999)

#R99-02000 \$10.00

This report presents data and analysis of approximately 122 national health promotion and disease prevention objectives under 17 priority areas. Each section provides background information on specific objectives, data sources and data limitations, trend analyses and significance tests, and summaries of findings. This report contains California data by various age and race/ethnic groups as well as data by gender.

Leading Health Indicators for California, 1997

(May 1999)

#R99-05000 \$10.00

A report containing health indicator data, including California life expectancy, age-adjusted death rates, infant mortality, teen births, low birthweight infants, and early prenatal care.

Profile of Women's Health Status in California, 1984-1994

(March 1997)

#R97-03000 \$20.00

This report presents trend data on demographic characteristics, life expectancy, mortality, hospitalizations, natality, communicable diseases, and risk factors for California's women from 1984 through 1994. This report contains California data by various age and race/ethnic groups.

Analysis of Health Indicators for California's Minority Populations, 1994

(February 1994)

#180M-5-92 \$10.00

This report analyzes selected health status indicators for 21 specific race/ethnic groups in California. It includes mortality, morbidity and birth indicators. Also included is an extensive literature review on the problems associated with analysis of race/ethnicity data. This is a one-time report.

DATA MATTERS AND DATA SUMMARIES

These "Data Matters" and "Data Summaries" reports are the most recently published of our shorter, topical reports, presented in alphabetical order. A complete list of reports can be found at the end of this section on pages 32 to 42.

AIDS Deaths, California, 1987-1996

(October 1998)

#DS98-10000 \$1.00

This report presents acquired immune deficiency syndrome (AIDS) deaths in California for the years 1987 through 1996. Reports related to HIV/AIDS deaths for prior years are also available.

Alcohol-Related Mortality, California, 1989-1995

(September 1997)

#DS97-09001 \$1.00

Alcohol-related mortality includes deaths in which alcohol abuse was a direct cause of death ("alcohol-defined" deaths), and deaths in which alcohol abuse was a contributing, but not a direct cause of death. Reports covering prior years are also available.

California's Infant Mortality Rate, 2000

(April 2002)

#DS02-04000 \$1.00

In 1999 and 2000, California had the lowest infant death rate ever recorded for the State. The 1999 infant death rate of 5.4 decreased 5.3 percent from the 1998 rate of 5.7 and has decreased 31.6 percent from the 1990 rate of 7.9. Reports covering prior years are also available.

California Life Expectancy: Abridged Life Tables by Race/Ethnicity for California, 1995-1997

(October 1999)

#DM99-10000 \$5.00

This report presents three-year average current abridged life tables for Californians for all races combined and for major race/ethnic groups. Life tables by sex for all Californians and for each race/ethnic group are also presented. Reports covering prior years are also available.

California Life Expectancy: Abridged Life Tables for California, 2000

(June 2002)

#DS02-06000 \$5.00

Population estimates released by the Department of Finance in January 1999 were used to calculate the 2000 life tables. For each year, life tables are presented for the total population, for males and for females. Reports covering prior years are also available.

Cancer Deaths, California, 1999

(March 2002)

#DS02-03000 \$1.00

Cancer continues to be the second leading cause of death in California and in the United States in 1999. This report presents the most current data on cancer deaths for 1999 and provides analysis of crude and age-adjusted death rates for California residents by sex, age, and race/ethnicity. A report covering the years 1989-1998 is also available.

Cerebrovascular Disease Deaths, California, 1999

(July 2002)

#DS02-07000 \$1.00

Cerebrovascular disease has historically been a leading cause of death in the United States and in California. This report focuses on cerebrovascular disease deaths during 1999 and provides analysis of data on crude and age-adjusted death rates for California residents by sex, age, and race/ethnicity. Reports covering the years 1980-1998 are also available.

Characteristics of Low Birthweight Infants, California, 1996

(February 1998)

#DS98-07002 \$1.00

Reducing the incidence of low birthweight is one of the Year 2000 National Health Objectives. Low birthweight infants represented 6.1 percent of all live births in 1996 and very low birthweight infants represented 1.1 percent. This report focuses on the number and percent of live births for selected characteristics by birthweight for 1996. These selected characteristics include plurality, gestation, birth order, sex, prenatal care, and age, race/ethnicity, education, and marital status of the mother. A report for the year 1989 is also available.

Chronic Liver Disease & Cirrhosis Deaths, California, 1998

(June 2001)

#DS01-06000 \$1.00

Chronic liver disease and cirrhosis has historically been a leading cause of death in the United States and in California. This report focuses on chronic liver disease and cirrhosis deaths during 1998 and provides analysis of data on crude and age-adjusted death rates for California residents by sex, age, race/ethnicity, county, and local health jurisdictions. Reports covering the years 1980-1996 and 1980-1997 are also available.

Chronic Obstructive Pulmonary Disease Deaths, 1998

(February 2001)

#DS01-02000 \$1.00

This report presents chronic obstructive pulmonary disease (COPD) death data for California residents by county and by city health jurisdictions. This report provides a brief background on the disease and various public health implications. California mortality and the national mortality levels are compared, and the state mortality is analyzed by race/ethnicity, gender, and age. Reports covering prior years are also available.

Diabetes Deaths in California, 1999-2000

(June 2002)

#DS02-06001 \$1.00

In 1999, diabetes was the sixth leading cause of death in the United States and was the underlying cause of 68,399 deaths that year. This report presents the most current data on diabetes deaths, and provides analysis of crude and age-adjusted death rates for California residents by sex, age, and race/ethnicity. This report contains data for the years 1999 and 2000. Reports covering the years 1970-1977 and 1980-1998 are available. A report on diabetes deaths among California Hispanics covering the years 1979-1980 is also available.

Differences in Death Rates Among California's Race/Ethnic Populations, 1996

(July 1998)

#DS98-07003 \$1.00

California's race/ethnic populations exhibit significant differences in their age-adjusted death rates. Blacks have significantly higher rates for most causes of death. Rates are generally lower for Hispanics and Asian/Pacific Islanders. This report presents data on one indicator of the health status of Californians – age-adjusted death rates – and how California's race/ethnic subgroups differ on this indicator.

Heart Disease Deaths in California, 1999

(July 2002)

#DS02-07001 \$1.00

Heart disease has historically been the leading cause of death in the United States and in California. This report focuses on heart disease deaths during 1999 and provides analysis of data on crude and age-adjusted death rates for California residents by sex, age, race/ethnicity, county, and local health jurisdictions. Reports covering the years 1970-1990, 1980-1996, 1997, and 1998 are also available.

HIV/AIDS Deaths, California, 1998

(August 2001)

#DS01-08000 \$1.00

In recent years the age-adjusted death rate due to HIV/AIDS has been declining in California and the U.S. This report presents the latest death data in California due to HIV and AIDS. The numbers and rates of HIV/AIDS deaths in this report were compiled and analyzed by sex, age, and race/ethnicity. Reports related to HIV/AIDS deaths for prior years are also available.

Homicides Among California's Children and Youth, 1992

(December 1993)

#DS93-12002 \$1.00

The majority of the 818 youth homicides in 1992 were over age 12 (83%). Among those under age 13, homicides among infants under 1 year old accounted for the largest number (40). This report provides analysis of the number of homicides and rates by race and gender for California residents under age 20. It also gives the three-year averages of homicides for the years 1949-1991. Reports covering homicides for prior years are also available.

Homicide Deaths by Race/Ethnicity, Age, and Sex, California, 1992

(January 1994)

#DS94-01001 \$1.00

In 1992, homicide was again one of the ten leading causes of death among California residents. During this period, California's 4,092 homicide deaths represented 15.4 percent of all United States homicide deaths, or approximately one out of every six United States homicides. This report provides analyses of the number homicides and rates by race/ethnicity, age, and sex for California residents. Reports covering homicides for prior years are also available.

Homicide Deaths, California, 1998

(September 2000)

#DS00-09000 \$1.00

This report reflects California's latest homicide death data by age, race/ethnicity, and sex. Also, data from an earlier Data Summary, "Homicide Deaths, California, 1980-1997" were referenced in this updated report to examine annual percent changes in the data and to monitor California's progress towards meeting the year 2000 national health objective 7.1. Reports covering homicides for prior years are also available.

Multiple Cause of Death in California, 1995

(June 1998)

#DM98-06000 \$5.00

This report goes beyond the usual analysis of mortality data, and covers not only the underlying cause of death, but also the other causes of death reported on the death certificate. Reports covering prior years are also available.

Pneumonia and Influenza Deaths, California, 1998

(January 2001)

#DS01-01001 \$1.00

Pneumonia and influenza was the 6th leading cause of death nationally (91,871 deaths) and the 4th leading cause of death in California for 1998 (13,316 deaths). This report presents data on deaths due to pneumonia and influenza for 1998 with analysis of crude and age-adjusted rates for California residents by sex, age, race/ethnicity, and county. Reports covering the years 1980-1996 and 1997 are also available.

Premature Mortality in California, 1998

(January 2001)

#DS01-01000 \$1.00

Year of potential life lost before age 75 (YPLL-75) is one of the commonly used measures in public health to reflect the impact of premature mortality on a population. This report summarizes 1998 California mortality data for selected causes of death contributing to premature mortality as measured by YPLL-75, and compares 1998 data with 1997 data. Reports covering prior years also available.

Prostate Cancer Deaths, California, 1988-1997

(September 1999)

#DS99-09000 \$1.00

In California, there will be an estimated 21,180 new cases of prostate cancer, and 3,285 men will die as a result of this disease in the year 2000. California's prostate cancer mortality data presented in this report were compiled using the latest data available, 1988 to 1997. These data were analyzed by age, race/ethnicity, and county of residence.

Suicide Deaths, California, 1998

(November 2001)

#DS01-11000 \$1.00

This report presents data on suicide deaths for the period of 1985-1998, and provides analysis of crude and age-adjusted death rates for California residents by sex, age, and race/ethnicity. Reports covering prior years are also available.

Trends in California's Teen Births, 1986-1996

(May 1998)

#DM98-05001 \$5.00

Trend data for the years 1986 through 1996 are presented for the state and where appropriate comparative data for the United States are included.

Trends in Cesarean Births in California, 1990-1997

(November 1998)

#DS98-11000 \$1.00

This report presents trend data on California's cesarean births for the years 1970-1997. Trends in the total, primary, and repeat cesarean births are shown, as well as trends by age and race/ethnicity of mother for the years 1990-1997. A report covering the years 1970-1986 is also available.

Unintentional Injury Deaths, California, 1998

(December 2001)

#DS01-12000 \$1.00

Unintentional injuries are a subset of a more general group of injuries referred to as External Causes of Injury, which includes not only unintentional injuries, but self-inflicted injuries and homicide as well. This report presents data on deaths in California resulting from unintentional injury. The data were compiled and analyzed by race/ethnicity, age, sex, and county of residence. A report covering the years 1980-1997 is also available.

DATA TABLES

Birth Profiles by Zip Code, California, 2001

(August 2002)

#DT02-08000 \$5.00

This table presents California's 2001 resident live births by zip code and by four key health status indicators (mother's age, mother's race/ethnicity, trimester prenatal care began, and infant's birthweight). The years 1989 to 2000 are also available.

The Birth Profiles by Zip Code publications can also be found on the Center for Health Statistics website at:

<http://www.dhs.ca.gov/hisp/chs/OHIR/Publication/ZIPCodeTables/BZipIndex.htm>

Death Profiles by Zip Code, California, 2000

(December 2001)

#DT01-12000 \$5.00

This table presents California's 2000 resident deaths by zip code and by decedent's gender, age, and the leading causes of death. Prior years are also available.

The Death Profiles by Zip Code publications can also be found on the Center for Health Statistics website at:

<http://www.dhs.ca.gov/hisp/chs/OHIR/Publication/ZIPCodeTables/DZipIndex.htm>
